Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach an actuating drive having a spindle drive connected to the plasticizing unit with an energy storage device coupled to the spindle drive for receiving energy in the return stroke phase and transferring in the feed phase to the spindle drive, and the spindle drive having a control mechanism to control the force transmitted between the energy storage device and spindle drive depending on a stroke position of the spindle drive. The closest prior art, Okada, only teaches the use of springs for use in aiding the vibration member within the ejection side of the mold and does not have the control mechanism to control the force transmitted. The other prior art, Stirn, does not have either the spindle drive connection to the plasticizing unit, energy storage device, nor the control mechanism to control the device depending on stroke. Thereby, the rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because a) the lines, numbers and letters are not uniform, clean and well defined (of a generally poor quality) in each of the 4 figures (37 CFR 1.84(l)). Applicant is advised to employ the services of a competent patent draftsman outside the Office,

Art Unit: 1722

as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
